

World Environment Day, celebrated annually on June 5th, is a global event to raise awareness and encourage action for the protection of our environment. It serves as a platform to highlight pressing environmental issues and foster collaboration among governments, businesses, organizations, and individuals to drive positive change. World Environment Day is a call to action, reminding everyone that protecting the environment is a shared responsibility and that collective effort is crucial for a sustainable future. WOMEV joins the rest of the world to celebrate this day since 2019 by taking action. Here WOMEV embarked on its “ Make Your Environment Better” slogan by collaborating with staff of the BOTANIC GARDEN to keep it clean so it can give its best to tourists and the community at large
